

Clack WS1 Residential Water Softener System

A SIMPLE SOLUTION FOR CLEANER, SAFER WATER IN YOUR HOME

The Trouble With Hard Water

Hard water is a common problem for many homeowners. When hardness minerals are combined with heat, it forms a scale that causes costly build-up in your plumbing, water heater and other water-using appliances. When the minerals are combined with soap, it can cause soap scum which leads to dry skin, itchy scalp, and dull, lifeless hair, among other issues.

BENEFITS OF SOFTER WATER

Cleaner, safer, better tasting water

Silky hair and softer skin

Softer laundry with less detergent

Spotless dishes and glassware

Lower water heating and maintenance costs

The Clack WS1 Water Softener System can be installed in your home to immediately offer premium water softening benefits to you and your family. This system cycles 28 gallons of water per minute and offers an easy-to-use front panel display, adjustable cycles and an 8-hour battery backup.

Systems are locally manufactured and assembled right in Florida!

All systems can be customized to each individual home's needs based on a water test.

Create peace of mind with a Clack WS1 Water Softening system from HL Plumbing!
